## Experience

### Product Data Scientist II/Product Manager, AI & Data | Yahoo | May 2024 — Present

- **Led cross-functional requirements gathering** across Design, Engineering, Product, Legal, and Analytics to ship data products used across Yahoo's consumer team.
- **Owned product strategy and roadmap** for Yahoo Scout (AI/LLM-powered) from concept through launch — shipping features that increased consumer engagement by 23% across a diverse user base.
- **Built and shipped AI-powered internal tools** using Claude: an experiment review agent that cut review cycle time by 30%, agentic dashboards saving 5+ hours of manual reporting weekly, and API workflows that uncovered 3 key model-tagging errors in production.
- **Defined the experimentation strategy** for the Generative AI module, increasing consumer engagement by 4% through hypothesis-driven experimentation and quantitative analysis to modify the product roadmap.
- **Identified and prioritized fixes** for critical drop-off points across the Yahoo ecosystem, designing targeted interventions that improved Search funnel conversion by 2%.
- **Designed and launched** an AI-powered Success Metrics Builder using Claude, automating the synthesis of stakeholder success criteria into a unified composite metric.

### Product Data Scientist I | Yahoo | March 2022 — May 2024

- **Directed product action** to improve click engagement by 2.5% by diagnosing underperforming query categories in the "people" module.
- **Uncovered a 19% search failure rate** through deep analysis of queries and user sessions — segmenting failures into actionable categories and guiding dedicated product squads to resolution.
- **Spearheaded the Yahoo Search redesign** across US and International markets — driving a 4% increase in search box engagement through analytics and experimentation strategy across the Web and Mobile platforms from inception through launch.
- **Achieved a 3% gain** in click-through rate by investigating the drop in clicks for the local module, identifying causality and delivering targeted recommendations directly to the product team.

### Content Analyst and Knowledge Engineer | Yahoo | August 2019 — March 2022

- **Improved product personalization** for 200M+ Yahoo Mail users — partnering with Engineering to automate workflows and ship data-driven features.
- **Optimized and debugged code** for reduced latency and applied pattern recognition to resolve complex problems.

## Projects and Recognition

### PM Experiment Planner ([Link](#))

Independently built and shipped an AI-powered tool for Product Managers — generating structured A/B experiment plans including metrics, guardrails, and success criteria.

### Above and Beyond Product Impact - Yahoo | November 2023

Recognized for leading a cross-functional search quality initiative — presenting findings to VP-level leadership, forming dedicated product squads, and developing an analysis framework adopted across multiple Yahoo Search projects.

## Skills

**Product Management** — Product Vision & Strategy • AI/ML Product Management • Experimentation design — A/B & MAB (Multi-Armed Bandits) tests • Product Requirements (PRDs) and Roadmap Development • Go-To-Market strategy • UX & User Research

**Data Science & AI** — KPI and North Star Metric Development • Product Analytics • Hands-on AI tooling and Building Agents — Claude (Code, Design, Cowork) • User Journey and Funnel Analysis • Tableau • SQL • Machine Learning

## Education

**Master of Science, Data Science** | Graduated 2026 — Indiana University, Bloomington

**Bachelor of Science, Management Information Systems** | Graduated 2019 — San Jose State University
